NATIONAL BANK INVESTMENTS

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

For the period ended June 30, 2026

Global Equity Fund

NBI *SmartData* International Equity Fund

Notes on forward-looking statements

This report may contain forward-looking statements concerning the Fund, its future performance, its strategies or prospects or about future events or circumstances. Such forward-looking statements include, among others, statements with respect to our beliefs, plans, expectations, estimates and intentions. The use of the expressions "foresee", "intend", "anticipate", "estimate", "assume", "believe" and "expect" and other similar terms and expressions indicate forward-looking statements.

By their very nature, forward-looking statements imply the use of assumptions and necessarily involve inherent risks and uncertainties. Consequently, there is a significant risk that the explicit or implicit forecasts contained in these forward-looking statements might not materialize or that they may not prove to be accurate in the future. A number of factors could cause future results, conditions or events to differ materially from the objectives, expectations, estimates or intentions expressed in such forward-looking statements. Such differences might be caused by several factors, including changes in Canadian and worldwide economic and financial conditions (in particular interest and exchange rates and the prices of other financial instruments), market trends, new regulatory provisions, competition, changes in technology and the potential impact of conflicts and other international events.

The foregoing list of factors is not exhaustive. Before making any investment decision, investors and others relying on our forward-looking statements should carefully consider the foregoing factors and other factors. We caution readers not to rely unduly on these forward-looking statements. We assume no obligation to update forward-looking statements in the light of new information, future events or other circumstances unless applicable legislation so provides.

This interim management report of fund performance contains financial highlights, but does not contain the complete interim financial statements of the investment fund. You can get a copy of the interim financial statements at your request, and at no cost, by calling 1-888-270-3941 or 514-871-2082, by writing to us at National Bank Investments Advisory Service, 800 Saint-Jacques Street, Transit 44331, Montreal, Quebec, H3C 1A3, by visiting our website at www.nbinvestments.ca, by visiting SEDAR+'s website at www.sedarplus.ca, or by contacting your advisor. You may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Management Discussion of Fund Performance

Results of Operations

For the six-month period ended June 30, 2026, the NBI *SmartData* International Equity Fund's Investor Series units returned 14.66% compared to 13.28% for the Fund's benchmark, the MSCI EAFE Index (CAD). Unlike the benchmark, the Fund's performance is calculated after fees and expenses. Please see the *Past Performance* section for the returns of all of the Fund's series, which may vary mainly because of fees and expenses.

Certain series of the Fund, as applicable, may make distributions at a rate determined by the manager. This rate may change from time to time. If the aggregate amount of distributions in such series exceeds the portion of net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The manager does not believe that the return of capital distributions made by such series of the Fund have a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objective.

The Fund's net asset value rose by 57.54% over the period, from $2.728 billion as at December 31, 2025 to $4.297 billion as at June 30, 2026.

The increase stemmed mainly from market fluctuations.The MSCI EAFE Index (USD, NTR) gained 9.44% in the year-to-date period, ending June 2026.

In this context, the Fund outperformed its benchmark.

Among countries, on a relative basis, stocks in Japan and the Netherlands contributed most positively to benchmark returns, primarily driven by gains from Information Technology and Financials sectors. On the flip side, stocks in Denmark and Germany contributed most negatively to benchmark returns, primarily driven by challenged performance in Information Technology and Consumer Discretionary sectors.

In terms of size factor, large caps remained relatively flat with respect to small caps, during the period under consideration, while in terms of style factors, Value remained flat with respect to Growth.

Among investment themes, signals within the Themes and Trends pillar contributed most positively to relative returns followed by the suite of signals within Fundamental Mispricings, Sentiment Analysis, and High-Quality Business Models.

Within Themes and Trends, economic linkages factors performed well. These factors use machine learning and natural language processing techniques to identify underlying connections between stocks that the broader market may not fully recognize. Meanwhile, signals gauging relative valuation within the Fundamental Mispricings pillar helped relative performance. Additionally, within Sentiment Analysis, factors evaluating analyst & management sentiment added to the relative returns of the portfolio. Finally, insider transactions related signals helped the performance of the High-Quality Business Models pillar.

Among sectors, holdings within the Industrials sector contributed the most to relative performance, with an overweight position within the Electrical Equipment industry contributing particularly strongly. On the downside, holdings within the Financials sector detracted the most from excess returns, where an underweight position within the Insurance industry hurt relative performance.

At an individual stock level, an underweight position in SAP SE, held primarily due to views around High-Quality Business Models related factors, performed well. Conversely, an overweight position in EssilorLuxottica SA, held primarily due to views on Sentiment Analysis related factors did not do well.

Among countries, the position in Japan contributed the most to relative performance. Meanwhile, the positioning in France detracted during the period.

The Fund has adhered to its ESG strategy as disclosed in the prospectus. During the period, there were no material divestments of portfolio securities as a result of the Fund's ESG strategy or applicable normative exclusions.

Recent Developments

There have been no material changes in the investment process/strategy during 1H26. However, the Fund's team has always maintained a robust research effort to develop new factors and data sources in order to maintain innovative sources of alpha.

The portfolio manager've provided below some highlights on the Fund's latest research enhancement.

In the first half of 2026, the QIS Equity Alpha team introduced eleven new signals into the Fund's investment models and expanded the scope of multiple existing signals. The full collection of enhancements spans across all four investment pillars the portfolio manager. e., High-Quality Business Models, Fundamental Mispricing, Themes & Trends, and Sentiment Analysis as well as multiple investment regions.

Firstly, within the Fund's Sentiment Analysis pillar in the US, the portfolio manager introduced a new signal that draws on a leading expert-network platform connecting investors with industry experts. The underlying conversations span a wide array of topics, including industry analysis, competitive dynamics, market trends, and the prospects for various products and technologies. The Fund's hypothesis is that expert views represent an informed and relatively uncrowded source of insight, underpinned by the depth of specialist knowledge and proprietary nature of these conversations. The portfolio manager believes this signal helps capture sentiment around companies that may be predictive of returns, while remaining differentiated from more widely followed information sources.

A second signal, introduced within the Emerging Markets region, captures information embedded in investor trading in the Indian futures market. India operates one of the most restrictive markets for short selling, and as a result investors frequently express negative views on a stock through the futures market rather than the underlying shares. By analysing this activity, the signal provides meaningful read on directional investor positioning that is otherwise difficult to observe in this market, and it adds to the Fund's short-term sentiment signals within the Emerging Markets model.

Another enhancement the team introduced focuses on company executive trading activity within Chinese companies, complementing the Fund's existing composite of insider signals. The Fund's hypothesis is that company executives possess superior information about company operations and outlook, and that their activity may reflect these views. By capturing the direction and patterns of this trading activity, these signals aim to provide an early read on company prospects. This new signal was included as part of the Fund's High-Quality Business Models pillar.

The next signal, introduced within the Fund's Japanese model, leverages timely business-activity data for retail consumer-based companies. While the portfolio manager has long believed that certain KPIs of consumer activity can serve as a leading indicator of stock returns, this latest approach leverages large-language modeling capabilities to focus on particular KPIs for different types of companies, based on what is most relevant. This allows for a timelier assessment of revenue trends and sensitivity to macro and company-specific events, and it contributes to the High-Quality Business Models pillar of the Fund's Japan model.

Please find below the changes in the Fund's sector level active weights for the period. Please note the Fund's sector allocations are mainly driven by the Fund's bottom-up stock selection views.

Main Overweight/Underweight positions (As of June 30, 2026):

Overweights:

Lonza Group AG

AXA SA

EssilorLuxottica SA

Industria de Diseno Textil SA

Henkel AG & Co KGaA

Underweights:

Novartis AG

HSBC Holdings PLC

Sumitomo Mitsui Financial Group Inc

Airbus SE

British American Tobacco PLC

Looking ahead, the portfolio manager continues to believe that cheaper stocks should outpace more expensive ones and good momentum stocks should do better than poor momentum stocks. The portfolio manager also prefer names about which fundamental research analysts are becoming more positive and companies that are profitable, have sustainable earnings and use their capital to enhance shareholder value. As such, the portfolio manager anticipates remaining fully invested and expect that the value they may add over time will be due to stock selection, as opposed to size allocations.

On April 30, 2026, Norman Turnbull resigned as member and President of the Fund's independent review committee (the "IRC"). On May 1, 2026, Yanic Chagnon was appointed IRC member and Marie Desroches was appointed as President of the IRC.

Related Party Transactions

National Bank of Canada ("the Bank") and its affiliated companies' roles and responsibilities related to the Fund are as follows:

Trustee, Custodian, and Registrar

Natcan Trust Company ("NTC"), an indirect wholly-owned subsidiary of the Bank, is the Fund's trustee. In this capacity, it is the legal owner of the Fund's investments.

NTC acts as registrar for the Fund's mutual fund series securities and the names of securityholders. NTC also acts as the Fund's custodian. The fees for NTC's custodial services are based on the standard rates in effect at NTC.

Agent for securities lending transactions

NTC acts as the agent for securities lending transactions on behalf of the Fund in administering securities lending transactions entered into by the Fund. NTC is an affiliate of the Manager.

Designated Broker

The manager has signed an agreement with National Bank Financial Inc. ("NBF"), a company affiliated with NBI, under which NBF will serve as a designated broker for the ETF Series and ETFH Series. The designated broker agreement signed with NBF is in keeping with market conditions.

Fund Manager

The Fund is managed by National Bank Investments Inc. ("NBI"), which is an indirect wholly-owned subsidiary of the Bank. Therefore, NBI provides or ensures the provision of all general management and administrative services required by the Fund's current operations, including investment consulting, the arrangement of brokerage contracts for the purchase and sale of the investment portfolio, bookkeeping and other administrative services required by the Fund.

The Manager pays the operating expenses of the Fund other than its "Fund costs" (defined below) (the "variable operating expenses"), in exchange for the Fund's payment to the Manager of annual fixed-rate administration fees with respect to each series of the Fund.

The administration fees are equal to a specified percentage of the net asset value of each series of the Fund, calculated and paid in the same manner as the Fund's management fees. The variable operating expenses payable by the Manager include, but are not limited to: transfer agency and recordkeeping costs; custodial costs; accounting and valuation fees; audit fees and legal fees; costs of preparing and distributing financial reports, simplified prospectuses, annual information forms, Fund Facts, continuous disclosure material and other securityholder communications; and costs of trustee services relating to registered tax plans, as applicable.

In addition to administration fees, the Fund shall also pay certain Fund costs, namely: taxes (including, but not limited to, GST/HST and income taxes); costs of compliance with any changes to existing governmental or regulatory requirements introduced after August 1, 2013; costs of compliance with any new governmental or regulatory requirements, including any new fees introduced after August 1, 2013; interest and borrowing costs; costs related to external services that were not commonly charged in the Canadian mutual fund industry as at August 1, 2013; Independent Review Committee costs, including compensation paid to IRC members, travel expenses, insurance premiums and costs associated with their continuing education; and variable operating expenses incurred outside of the normal course of business of the Fund.

The Manager may, from time to time and at its sole discretion, decide to absorb a portion of a series' management fees, administration fees or Fund costs.

As described under the heading *Management Fees*, the Fund pays annual management fees to NBI as consideration for its services.

Distribution and Dealer Compensation

National Bank Savings and Investments Inc. ("NBSI") acts as principal distributor for the mutual fund series of the Fund. In this capacity, NBSI buys, sells and swaps securities through Bank branches and the National Bank Investments Advisory Service in Canadian provinces and territories, and through external registered representatives. Fund securities are also offered by National Bank Financial Inc. (including its division National Bank Direct Brokerage) and other affiliated entities. Brokers may receive, depending on the distributed series, a monthly commission representing a percentage of the average daily value of the securities held by their clients.

Brokerage Fees

The Fund may pay broker's commissions at market rates to a corporation affiliated with NBI. The brokerage fees paid by the Fund for the period are as follows:

	Period ended June 30, 2026
Total brokerage fees	$2,798,300.55
Brokerage fees paid to National Bank Financial	$2,798,300.55

Holdings

As at June 30, 2026, National Bank Investments Inc. held 19,153.11 Fund securities for a value of $357,814.64, which represented close to 0.0077% of the net asset value of the Fund at that date. Transactions between National Bank Investments Inc. and the Fund were carried out in the normal course of business and at the Fund's net asset value as at the transaction date.

Registered Plan Trust Services

NTC receives a fixed amount per registered account for services provided as trustee for registered plans.

Administrative and Operating Services

The provision of certain services was delegated by the Fund Manager, NBI, to National Bank Trust Inc. ("NBT"), a direct and indirect wholly-owned subsidiary of the Bank. These include accounting, reporting and portfolio valuation services. The fees incurred for these services are paid to NBT by the Fund manager.

Management Fees

The Fund pays annual management fees to the Fund manager for its management services. The fees are calculated based on a percentage of the Fund's daily net asset value before applicable taxes and are paid on a monthly basis. Under the *Distribution* heading, expenses include the broker's compensation consisting of the maximum annual trailer fees and sales commissions paid to brokers. Under the *Other* heading, the fees relate mainly to investment management, investment advisory services, general administration and profit. The breakdown of major services provided in consideration of the management fees, expressed as an approximate percentage of the management fees is as follows:

Series	Management Fees	Distribution	Others[†]
Investor Series	1.40%	71.43%	28.57%
Advisor Series and Series T5*			
Front-end load**	1.40%	71.43%	28.57%
Series H*			
Front-end load	1.40%	71.43%	28.57%
Series F, Series FH and Series F5	0.40%	—	100.00%
Series N and Series NR***	0.30%	—	100.00%
Series O	N/A****	—	100.00%
ETF Series and ETFH Series*****	0.40%	—	100.00%

(†) Includes all costs related to management, investment advisory services, general administration and profit.

(*) Excluding sales commissions paid on the Advisor Series, Series H and Series T5 with low sales charges option and deferred sales charge option, which are not paid for out of the management fees.

(**) Rate applicable for all investments, including Advisor Series existing before May 14, 2015, systematic investment programs, reinvested distributions and switches.

(***) For Series N and NR, offered only to investors using the NBI Private Wealth Management service ("PWM"), management fees only cover management of fund investments, i.e. the fees related to management of fund portfolios constituting the PWM profiles. General administration services, trailer fees and sale commissions paid to brokers are covered by the PWM's service fees, which are paid directly by investors.

(****) The Series O is only available to selected investors that have been approved and have entered into an O Series units account agreement with National Bank Investments Inc. The criteria for approval may include the size of the investment, the expected level of account activity and the investor's total investments with NBI. No management fees are charged to the Fund with respect to the O Series units. Management fees are negotiated with and paid directly by investors and are in addition to the fixed-rate administration fee. NBI does not pay any commissions or service fees to dealers who sell O Series units. There are no sales charges payable by investors who purchase O Series units.

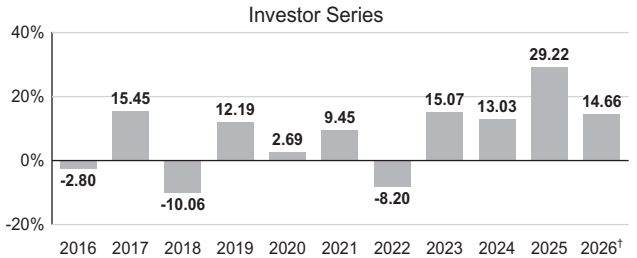

(*****) The ETF Series and ETFH Series are listed on the Toronto Stock Exchange ("TSX" or the "Exchange"), and investors may buy or sell units of the ETF Series and ETFH Series on the TSX or another marketplace through registered brokers and dealers in the province or territory where the investor resides.

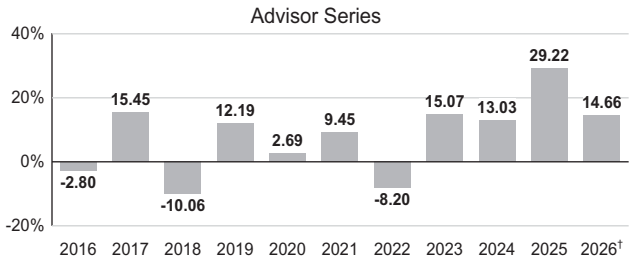

Past Performance

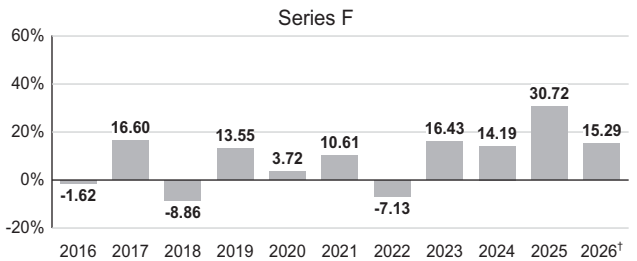

The performance of each series of the Fund is presented below and calculated as at December 31 of each year. It assumes that all distributions made in the periods shown were reinvested in additional securities and does not take into account sales, redemption charges, distributions, or optional charges that would have reduced returns. Past performance of a series of a Fund does not necessarily indicate how it will perform in the future.

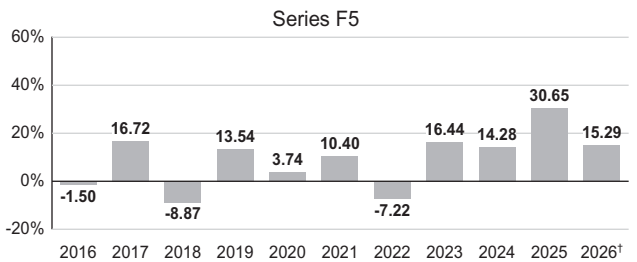

Annual Returns

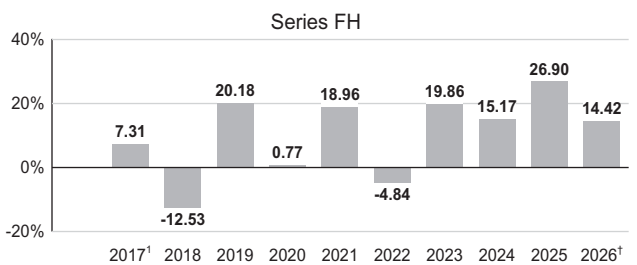

The bar charts indicate the performance for each of the Fund's series in existence greater than one year during the years shown, and illustrate how the performance has changed from year to year. They show, in percentage terms, how much an investment made on January 1 (or made commencing from the start of the series) would have grown or decreased by December 31 of that year, in the case of the Annual management report of fund performance, or by June 30, in the case of the Interim management report of fund performance.

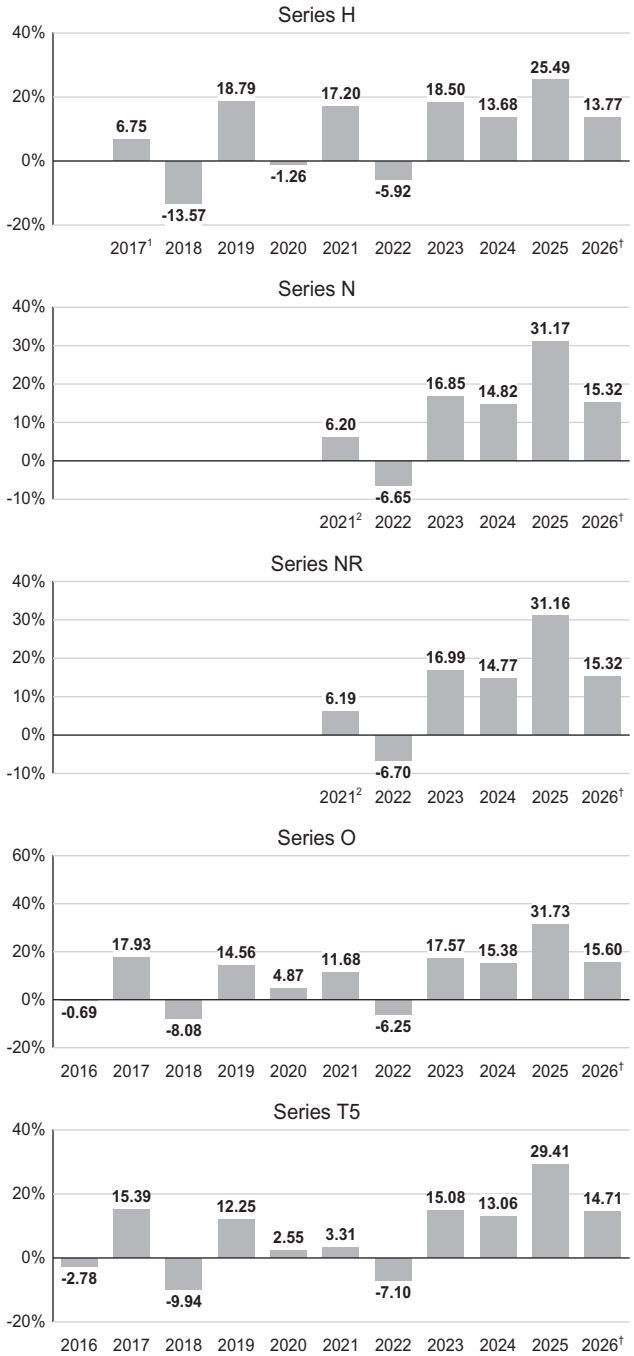

(1) *Returns for the period from May 19, 2017 (commencement of operations) to December 31, 2017.*

(2) *Returns for the period from May 5, 2021 (commencement of operations) to December 31, 2021.*

(†) *Returns for the period from January 1, 2026 to June 30, 2026.*

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the accounting periods shown.

Investor* / Advisor Series

(*) Please note that the data presented below is in CAD although the Advisor Series is also available under the USD purchase option. The Investor Series was created on October 30, 2015.

Trading expense ratio (%) [7]	0.11	0.18	0.14	0.14	0.19	0.18
Portfolio turnover rate (%) [8]	76.32	149.82	157.69	151.44	187.97	169.05
Net asset value per unit ($)	15.63	13.52	11.87	10.84	9.54	10.56

[1] *This information is derived from the Fund's Annual Audited Financial Statements and Interim Unaudited Financial Statements. The net assets per unit presented in the financial statements might differ from the net asset value calculated for fund pricing purposes. The differences are explained in the notes to the financial statements.*

[2] *Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase or decrease from operations is based on the average number of units outstanding over the accounting period.*

[3] *Distributions were paid in cash or reinvested in additional units of the Fund, or both.*

[4] *The net assets are calculated in accordance with IFRS.*

[5] *This information is provided as at the last day of the accounting period shown.*

[6] *Management expense ratio is based on total expenses including sales taxes for the accounting period indicated (excluding commission, other portfolio transaction costs and withholding taxes) and is expressed as an annualized percentage of daily average net value during the accounting period. The management expense ratio includes, if necessary, the management expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.*

[7] *The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the accounting period. The trading expense ratio includes, if necessary, the trading expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.*

[8] *The Fund's portfolio turnover rate indicates how actively the Fund portfolio's manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the accounting period. The higher a Fund's portfolio turnover rate in an accounting period, the greater the trading costs payable by the Fund in the accounting period, and the greater the chance of an investor receiving taxable capital gains in the accounting period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.*

Summary of Investment Portfolio

As of June 30, 2026
