A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements about the Funds, their future performance, strategies or prospects, and possible future Fund actions. The words “may”,“could”, “should”, “would”, “suspect”, “outlook”, “believe”, “plan”, “anticipate”, “estimate”, “expect”, “intend”, “forecast”, “objective” and similar expressions are intended to identify forward-looking statements.

Forward-looking statements are not guarantees of future performance. Forward-looking statements involve inherent risks and uncertainties, both about the Funds and general economic factors, so it is possible that the predictions, forecasts, projections and other forward-looking statements will not be achieved. We caution you not to place undue reliance on these statements as a number of important factors could cause actual events or results to differ materially from those expressed or implied in any forward-looking statements made by the Funds. These factors include but are not limited to, general economic, political and market factors in Canada, the United States and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological changes, changes in laws and regulations, judicial or regulatory judgments, legal proceedings and catastrophic events.

The above list of important factors that may affect future results is not exhaustive. Before making any investment decisions, we encourage you to consider these and other factors carefully. All opinions contained in forward-looking statements are subject to change without notice and are provided in good faith as of the date of this report and without legal responsibility. There should be no expectation that such statements will be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise, unless applicable legislation provides for such an obligation.

MESSAGE TO INVESTORS

FRÉDÉRICK TREMBLAY
PRESIDENT AND CHIEF OPERATING OFFICER
DESJARDINS INVESTMENTS INC.

The 2024-2025 financial year ended on September 30, and I am pleased to invite you to review this annual management report on the performance of the Desjardins Funds. This document contains relevant information about the funds in which you hold shares, including management's analysis of performance, financial highlights, past performance and a portfolio overview.

Economy and Market Review

After showing some optimism at the end of 2024, stock markets experienced mixed performance during the financial year, marked by high volatility resulting largely from uncertainty over new tariff measures imposed by the Trump administration. The prospect of a trade war, the growing risk of inflation and an economic slowdown weighed on the markets in early 2025. However, the situation subsequently stabilized thanks to the suspension or postponement of certain tariff measures, allowing stock market indices to rebound. Today, the trade war waged by the Trump administration is less a reversal of globalization than a reconfiguration of trade. Indeed, the warming of relations between several countries since the imposition of US tariffs illustrates this trend. The major stock markets ended the period on a high note, reaching new highs driven by earnings-per-share growth forecasts and expanding valuation multiples. This market momentum is due in part to the AI investment frenzy, the magnitude of which recalls the tech bubble of the 2000s.

Developments that enrich our line of funds

Keeping the best interests of our members and clients at heart, Desjardins has continued to enhance its Desjardins Funds offering. We focused on the following four areas: 1. Simplification of the mutual fund lineup; 2. Expansion of the Desjardins Funds lineup; 3. Portfolio manager changes; 4. Management fee reductions.

1. Simplification of the mutual fund lineup

Desjardins Investments Inc. (DI) has made changes to provide a comprehensive and simplified line of portfolios, a simple and accessible experience for its clients and competitive pricing. DI now offers its members and clients three main lines of portfolios, each of which responds to specific needs:

- Desjardins Active Strategy Portfolios: Resulting from the merger of Melodia and Chorus II Portfolios, this solution is built on the expertise of Desjardins Global Asset Management (DGAM), one of Canada's leading portfolio managers, which calls upon the subadvisory services of some of the best-known names in the business.
- Desjardins Sustainable Portfolios: This responsible investment solution is for investors who want to contribute to a more sustainable global economy. Some portfolios have been renamed to align with other portfolios in the lineup.
- Desjardins ETF Portfolios: Formerly known as Wise ETF Portfolios, this solution provides simple access to the world of exchange-traded funds. These changes were paired with the launch of Class A units.

These changes aim to simplify investment decisions while offering accessible and competitive solutions.

2. Expansion of the Desjardins Funds lineup

To meet the diverse needs of investors, Desjardins has expanded its offering with six new target-maturity bond funds, two new global equity funds — the Desjardins Global Opportunities Fund and the Desjardins Global Fundamental Equity Fund — as well as a new balanced fund, the Desjardins Tactical Asset Allocation Fund. These additions aim to provide more choices and meet a variety of financial objectives.

3. Portfolio manager changes

Ensuring that our members and clients benefit from the best suited portfolio managers for each mandate is important to us. With this in mind, over the past year, we announced the following portfolio manager changes: Desjardins Global Asset Management Inc. was selected as sole manager of the Desjardins Enhanced Bond Fund; Ninety One North America, Inc. was selected portfolio sub-manager of the Desjardins Sustainable International Equity Fund; Hermes Investment Management Limited was selected portfolio sub-manager of the Desjardins Sustainable Emerging Markets Equity Fund; Wellington was selected sole portfolio sub-manager of the Desjardins Global Small Cap Equity Fund; and Amundi Canada Inc. and Amundi (UK) Limited were selected portfolio sub-manager of the Desjardins Global Corporate Bond Fund and the Desjardins Sustainable Global Corporate Bond Fund.

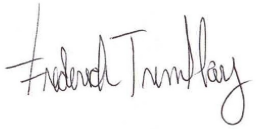

4. Management fee reductions

During the year, further reductions were made to the management fees of some unit classes of Desjardins Funds, amounting to up to 20 basis points. These reductions are a part of DI's commitment to offering investment funds managed by world-class portfolio managers while maintaining competitive management fees.

A 2025–2026 fiscal year characterized by continuity

Over the next year, we will continue to focus on delivering what really matters to you: simple, effective and adaptive investment solutions, tailored to meet your financial needs and goals. Several changes have already been announced, including management fee reductions, the introduction of new class units, portfolio sub-manager changes and fund terminations, to ensure our lineup remains relevant.

Desjardins thanks you for your continued trust and reiterates its commitment to serving you better and working in your best interests.

Desjardins Active Strategy Balanced Portfolio

(formerly Melodia Diversified Growth Portfolio)

(A-, T5-, T7-, I-, C-, R5-, R7-, F-, S5-, S7-, O-, P5-, P7- AND D-CLASS UNITS)

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

The objective of this Portfolio is to strike a balance between income return and long-term capital appreciation. Consequently, the Portfolio invests mainly in the units of mutual funds, which themselves invest in equity and fixed-income securities throughout the world.

The portfolio manager will actively choose the underlying funds and determine the Portfolio's asset allocation in each of these, while respecting the Portfolio's investment objective. The target weightings are at 50% for fixed-income securities and at 50% for equity securities. The Portfolio is a strategic asset allocation fund.

The Portfolio and the underlying funds in which the Portfolio invests may use derivatives for both hedging and non-hedging purposes. The underlying funds may also engage in securities lending, repurchase and reverse repurchase transactions.

Risk

Please note that no change taking place during the fiscal year had a material impact on the overall risk linked to an investment in securities issued by this Fund. Said risk remains true to its description in the Simplified Prospectus as at March 28, 2025. Furthermore, the Fund is still intended for investors with a low to medium tolerance for risk.

Results of Operations

As of September 30, 2025, the Melodia Diversified Growth Portfolio (A-Class units) posted a 8.92% return, compared to 12.17% for its blended benchmark. The broad-based index, FTSE Canada Universe Bond Index, posted a 2.93% return for the same period. As opposed to the indices, the Fund's performance is net of fees and expenses. Please refer to the "Past Performance" section for the details of returns by class and to the "Other Material Information" section for more information on the benchmark and broad-based index. Performance differences between classes of units are mainly due to management fees charged to each class.

The portfolio's exposure to equity markets, particularly Canadian equities, was positive for performance during the financial year. Conversely, exposure to fixed-income securities had a negative impact despite their positive returns.

Within the fixed income portion of the portfolio, overweighting global high-yield bonds from developed countries and emerging market bonds proved to be a wise move, given the clear superiority of these securities' yields compared to those of developed country government bonds and Canadian bonds. As for the equity portion, the overweighting of global equities (financed by an underweighting of Canadian equities) detracted from value.

The portfolio manager made several strategic and tactical changes in November. First, it strategically reduced the weighting of the Desjardins Dividend Growth Fund and U.S. equity funds to add two new positions in global equities. A redesign of international equities was also carried out. The manager liquidated positions in the Desjardins Overseas Equity Growth Fund and reinvested the proceeds in other international equity funds.

Between December and February, the weighting of global small-cap equities was strategically reduced, with the proceeds reinvested in international equity funds. In addition, the DGAM Global Private Infrastructure Fund made a final capital call during the period, adding to its existing exposure to global private infrastructure. At the end of August, a position in the Desjardins Global Macro ETF was added, increasing the weighting of liquid alternative strategies within the portfolio.

In September, the portfolio manager made significant changes to the portfolio's composition. It strategically increased the weighting of corporate bonds and global high-yield bonds and reduced that of global government bonds and Canadian equities. Finally, it introduced a tactical component through the Desjardins Tactical Asset Allocation Fund.

Recent Developments

Over the past few months, the global economy has shown resilience despite geopolitical tensions and changing monetary policies. Growth was moderate, supported by accommodative fiscal policies in several regions. Despite slowing down, inflation is still above target in several advanced economies, prompting central banks to adopt a cautious stance on interest rates. Bond markets were volatile, while stock markets benefited from investor optimism about technological innovation and artificial intelligence.

The economic outlook will remain uncertain in the coming months. Growth is expected to stabilize, but risks associated with increasing fragmentation in global trade, high levels of public debt, and geopolitical tensions remain. In such a context, financial markets remain highly exposed to these phenomena and react to economic policy adjustments, central bank decisions, and other global events.

The portfolio manager carries out an annual review of the portfolio's strategic allocation on the basis of long-term outlooks.

As stated in the simplified prospectus of the Desjardins Funds dated March 28, 2025, T5-, T7-, R5-, R7-, S5-, S7-, O-, P5- and P7-Class Units were launched on April 23, 2025.

As stated in Amendment No. 1 dated April 23, 2025, to the simplified prospectus of the Desjardins Funds dated March 28, 2025, the Manager proceeded with the merge of the Melodia Diversified Income Portfolio and the Chorus II Balanced Low Volatility Portfolio with the Portfolio on September 12, 2025.

The Manager subsequently amended the investment strategies and changed the name of the Portfolio on September 16, 2025. The Melodia Diversified Growth Portfolio has been renamed the Desjardins Active Strategy Balanced Portfolio.

K-, L5- and L7-Class Units were also launched as planned on November 17, 2025. These units are offered to holders of A-, T5- and T7-Class Units respectively, which will be automatically converted into K-, L5- and L7-Class Units as applicable, when the eligibility criteria are met.

On September 12, 2025, the Manager reduced the management fees for some of the Fund's unit classes:

	PREVIOUS MANAGEMENT FEES BEFORE TAXES (%)	MANAGEMENT FEES STARTING SEPTEMBER 12, 2025 BEFORE TAXES (%)
A-, T-, C- AND R-CLASS	1.69	1.49
D-CLASS	0.79	0.59

Related Party Transactions

Desjardins Investments Inc. (DI) is the Fund's Manager pursuant to the administration agreement. The Manager ensures the daily administration of the Fund. It provides the Fund or makes sure the Fund is provided with all services (accounting, custody, portfolio management, record maintenance, transfer agent) required to function properly. The Fund pays management fees to the Manager, which are calculated on a daily basis with the net asset value of the Fund and paid weekly. These fees are shown in the "Management Fees" section of this Report. Management and administrative fees presented in the Statement of Comprehensive Income were incurred with the Manager of the Desjardins Funds.

Desjardins Trust Inc., an entity belonging to the same group as the Manager, is the Fund's trustee and custodian. As the Fund's trustee, Desjardins Trust Inc. fees are paid by the Manager. The custodian fees of Desjardins Trust Inc. are paid by the Manager and are established based on market conditions. To the extent the Fund may engage in securities lending transactions, Desjardins Trust Inc. may also act as securities lending agent.

Desjardins Global Asset Management Inc. (DGAM) is the portfolio manager of the Fund. DGAM is an entity belonging to the same group as the Manager. DGAM's fees are entirely paid by the Manager.

Units of the Funds are offered by Desjardins Securities Inc. (including its division Desjardins Online Brokerage), Desjardins Financial Services Firm Inc., Desjardins Financial Security Investments Inc., Worldsource Financial Management Inc. and Worldsource Securities Inc., entities affiliated to the same group as the Manager. Brokers may receive, depending on the distributed class units, a monthly trailing

commission, calculated on the average monthly units outstanding for each Fund sold by the relevant broker.

The Fund relied on the standing instructions of its Independent Review Committee (IRC) with respect to purchasing or holding securities of the DGAM Global Private Infrastructure Fund L.P., a fund managed by DGAM.

In accordance with the IRC's standing instructions, in making a decision to cause the Fund to enter into a related party transaction, the Manager and the portfolio manager of the Fund are required to comply with the Manager's written policies and procedures governing the related party transaction and report periodically to the IRC, describing each instance that the Manager relied on the standing instructions and its compliance or non-compliance with the governing policies and procedures.

The governing policies and procedures are designed to ensure that each related party transaction (i) is made free from any influence of the Manager or an entity belonging to the same group as the Manager and must not take into account any consideration relating to the Manager or an entity belonging to the same group as the Manager ii) represents the business judgment of the portfolio manager without influence other than the best interests of the Fund, and (iii) achieves a fair and reasonable result for the Fund.

Accrued expenses payable (receivable) to the Fund's Manager are:

	SEPTEMBER 30, 2025	SEPTEMBER 30, 2024
	$	$
EXPENSES PAYABLE (RECEIVABLE)	**3,231,417**	1,735,280

During the period, the Fund received income from exchange traded funds managed by related parties:

	SEPTEMBER 30, 2025	SEPTEMBER 30, 2024
	$	$
DIVIDENDS	**1,235,962**	—

During the period, the Fund received income from funds managed by related parties:

	SEPTEMBER 30, 2025	SEPTEMBER 30, 2024
	$	$
DISTRIBUTIONS FROM UNDERLYING FUNDS	**230,818,657**	123,410,106

(1) This information is derived from the Fund's audited annual financial statements. The net assets per unit presented in the financial statements may differ from the net asset value calculated for fund pricing purposes.
(2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the period.
(3) Distributions were paid in cash or reinvested in additional units of the Fund.

(1) Management expense ratio is based on total expenses (including applicable taxes and including its proportionate share of the total expenses of the underlying funds, where applicable, but excluding commissions and other portfolio transaction costs and excluding withholding taxes) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

(2) Management expense ratio relating to I-Class units is based on total expenses (including applicable taxes and including its proportionate share of the total expenses of the underlying funds, where applicable, but excluding commissions and other portfolio transaction costs and excluding withholding taxes, as well as management fees paid to the Manager, which may differ from one investor to another, as they are negotiated by each one of them directly with the Manager) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs, including from September 30, 2023, its proportionate share of the expenses incurred by the underlying funds, where applicable, and indirectly attributable to the Fund, expressed as an annualized percentage of daily average net asset value during the period.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Management Fees

Management fees payable to the Manager by the Desjardins Active Strategy Balanced Portfolio are calculated daily on the net asset value of the Fund at an annual rate of 1.49% for A-, T-, C- and R-Class units. These fees are paid weekly.

The major services paid by the management fees expressed as an approximate percentage of said management fees may be summarized as follows:

• Administration of the Fund, investment portfolio management and profit margin	0.49%
• Dealer compensation	0.90%
• Marketing expenses	0.10%

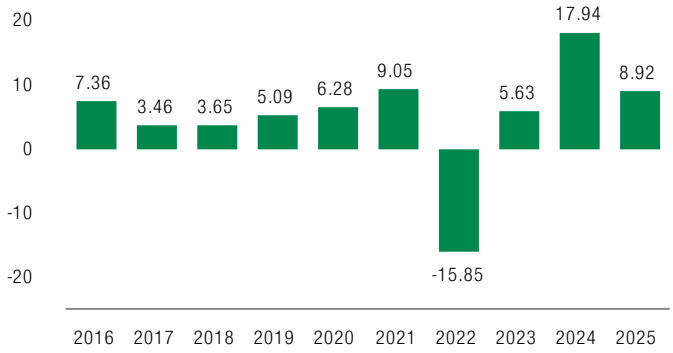

PAST PERFORMANCE

Performance data assumes that all distributions of each class of the Fund for the periods shown were reinvested in additional Fund units. However, it does not take into account purchases, redemptions, investments or other optional charges, and returns would be lower if it did.

The past performance of each class of the Fund is not necessarily indicative of future performance.

These graphs present the annual performance of each class of the Fund for each fiscal year shown and illustrate the evolution of each class of the Fund from one year to the next. These graphs also indicate, in percentage terms, how the value of an investment made on the first day of each fiscal year would have evolved as of the last day of that fiscal year. The last column shows the total performance of each class of the Fund at the end of the fiscal year. Returns may differ from one class to another for a number of reasons, including if the class was not issued and outstanding for the entire period under review and because of the different levels of management fees and expenses.

The Annual Compound Returns table compares the performance of each class of the Fund with one or several indices, which includes reinvested income, but does not include management and trading expenses.

* The blended index is comprised as follows

FTSE Canada Universe Bond Index: 35%

MSCI Canada Index: 15%

MSCI ACWI ex Canada IMI Index (Total return): 35%

Bloomberg Multiverse Bond Index (CAD hedged): 15%

FTSE Canada Universe Bond Index

The FTSE Canada Universe Bond Index is designed to be a broad measure of performance of marketable government and corporate bonds outstanding in the Canadian fixed-income market. It includes investment-grade bonds, with a term to maturity of over one year, a minimum issue size of $50M for government bonds and $100M for corporate bonds, and a minimum of 10 institutional buyers.

Bloomberg Multiverse Bond Index (CAD hedged)

The index provides a broad-based measure of the global fixed-income bond market. The index represents the union of the Global Aggregate Index and the Global High-Yield Index.

MSCI ACWI ex Canada IMI Index (Total return)

The MSCI ACWI ex Canada Investable Market Index (IMI) captures large, mid and small cap representation across 22 of 23 developed markets countries (excluding Canada) and 26 emerging markets countries.

MSCI Canada Index (Total return)

The MSCI Canada Index is designed to measure the performance of the large and mid cap segments of the Canada market.

Please refer to the "Other Material Information" section for more information on the benchmark(s).

Comparison with the Index

As of September 30, 2025, the Melodia Diversified Growth Portfolio (A-Class units) posted a 8.92% return, compared to 12.17% for its blended index. The FTSE Canada Universe Bond Index posted a 2.93% return for the same period. As opposed to the benchmark, the Fund's performance is net of fees and expenses. Please refer to the "Past Performance" section for the details of returns by class and to the "Other Material Information" section for more information on the benchmarks. Performance differences between classes of units are mainly due to management fees charged to each class.

OTHER MATERIAL INFORMATION

A-Class units of this Fund are offered to all investors. The Fund's investment portfolio is the same for all its unit classes.

T-Class units of this Fund provide a monthly cash distribution consisting of net income, a non-taxable return of capital or a combination of both. They were designed for investors who wish to have an additional tax-advantaged income to complement their income from other sources. The Fund's investment portfolio is the same for all its unit classes.

I-Class units of this Fund are offered to large investors who make the required minimum investment. The Fund's investment portfolio is the same for all its unit classes.

C-Class units of this Fund are offered to investors who purchase units using an initial sales charge option, a deferred sales charge option or a low load sales charge option. These units are offered only if the investor's dealer has reached a security agreement with the Fund's Manager. The Fund's investment portfolio is the same for all its unit classes.

R-Class units of this Fund are offered to investors who purchase units using an initial sales charge option, a deferred sales charge option or a low load sales charge option. These units provide a monthly cash distribution consisting of net income, a non-taxable return of capital or a combination of both. They were designed for investors who wish to have an additional tax-advantaged income to complement their income from other sources. These units are offered only if the investor's dealer has reached a security agreement with the Fund's Manager. The Fund's investment portfolio is the same for all its unit classes.

F-Class units of this Fund are offered to investors who compensate their dealer on a "fee for service" basis, who have a dealer-sponsored wrap account or who pay their dealer an annual fee and where the dealer does not receive trailing commissions. These units are offered only if the investor's dealer has reached a security agreement with the Fund's Manager. The Fund's investment portfolio is the same for all its unit classes.

S-Class units of this Fund are offered to investors who compensate their dealer on a "fee for service" basis, who have a dealer-sponsored wrap account or who pay their dealer an annual fee and where the dealer does not receive trailing commissions. These units provide a monthly cash distribution consisting of net income, a non-taxable return of capital or a combination of both. They were designed for investors who wish to have an additional tax-advantaged income to complement their income from other sources. These units are offered only if the investor's dealer has reached a security agreement with the Fund's Manager. The Fund's investment portfolio is the same for all its unit classes.

O-Class units of this Fund are offered within the Centre de Service Signature to investors who compensate their representative on a "fee for service" basis, who have a representative's firm-sponsored wrap account or who pay their representative's firm an annual fee and where the representative's firm does not receive trailing commissions from the Manager. These annual fees can be negotiated between the investor and his or her representative's firm. These units are offered only if the investor's representative's firm has reached a security agreement with the Manager.

P-Class units of this Fund are offered to investors who compensate their representative on a "fee for service" basis within the Centre de Service Signature who have a representative's firm-sponsored wrap account or who pay their representative's firm an annual fee and where the representative's firm does not receive trailing commissions from the Manager. These annual fees can be negotiated between the investor and his or her representative's firm. These investors wish to have additional tax-advantaged income to complement their income from other sources. Not offered under registered plans. These units offer a monthly cash distribution which consists of net income and/or a non-taxable return of capital. The distribution amount is not guaranteed and may be adjusted by the Manager in accordance with long-term market conditions. A return of capital reduces the value of your original investment and is not the same as a return on your investment. Returns of capital that are not reinvested may reduce the net asset value of the Fund and the Fund's subsequent ability to generate income. The distinction between P-, P4-, P5-, P6-, P7- and P8-Class units is based on the distribution policy. These units are offered only if the investor's representative's firm has reached a security agreement with the Manager.

D-Class units of this Fund are offered to investors who purchase their units through Disnat Online Brokerage or an account with a discount broker and who compensate the discount broker's firm on a "fee for service" basis; the discount broker's firm does not receive trailing commissions from the Manager. These units are offered on a no-load basis, which means no initial sales charge and no deferred sales charge.

However, the broker executing the transaction may charge the investor execution fees for any transaction on such units. These execution fees can be negotiated between the investor and the discount broker. The investor should refer to the agreement entered with their discount broker for more information. These units are offered only if the investor's discount brokerage firm has entered into a security investment agreement with the Manager.
